Application No.: 10/693;534

Atty. Docket: GOJ03030 (GOJ.P96US)

## **Listing of Claims:**

1. (Original) A universal adapter clip used in connection with a container that is received within a soap dispenser having a key-plate, the clip comprising:

- a) a hollow body attachable to the container;
- b) a flange extending radially outward from said body; and
- c) a tab extending rearwardly from said body and axially spaced from said flange to receive the key-plate therebetween upon insertion of the container within the dispenser.
- 2. (Original) The universal adapter clip of Claim 1, wherein said flange is located at an upper vertical extremity of said body and said tab is located at a lower vertical extremity of said body.
- 3. (Original) The universal adapter clip of Claim 1 further comprising a rim extending downwardly from a radial outer extremity of said flange, wherein said rim is adapted to contact a top surface of the key-plate.
- 4. (Original) The universal adapter clip of Claim 3, wherein said tab includes a first portion extending rearward from said body and a second portion extending rearward from said first portion and stepped downward relative to said first portion.
- 5. (Original) The universal adapter clip of Claim 4, wherein said first portion and said second portion form a vertically extending shoulder adapted to engage the key-plate upon insertion.

Atty. Docket: GOJ03030 (GOJ.P96US)

6. (Original) The universal adapter clip of Claim 1, wherein said body is semi-circular and opens rearwardly relative to the dispenser.

- 7. (Original) The universal adapter clip of Claim 1, wherein said body is opened at either axial end and adapted to receive a portion of the container therethrough.
- 8. (Currently Amended) The universal adapter clip of Claim 7, wherein said top-flange includes a radially inward extending portion adapted to grasp a projecting surface on the container.
- 9. (Original) A universal adapter clip of Claim 1 that defines a notch adapted to receive a locating projection on the container.
- 10. (Original) The universal adapter clip of Claim 1 further comprising a hold formed on said body.
- 11. (Original) The universal adapter of Claim 10, wherein said hold includes a pair of vertically extending ribs extending forwardly from said body opposite the key-plate.
- 12. (Original) A universal adapter clip for securing a container within a soap dispenser, where the dispenser has a receiver, the universal adapter clip comprising a body attachable to the container; a pair of tabs extending rearwardly from said body, said tabs being insertable beneath the receiver; a rim formed on a top portion of said body said rim extending over at least a portion of the receiver, wherein the receiver is at least partially received between said rim and said tabs.
- 13. (Original) A universal adapter clip for securing a container within a soap dispenser, where the dispenser has a key-plate, the universal adapter clip comprising a semi-

circular body open on a rearward side to receive a portion of the container; an annular base defining an opening through which a nozzle of the dispenser extends; a pair of tabs extending rearward from said bottom flange, wherein each end of said tabs steps downward from said bottom flange to extend beneath the key-plate upon insertion; a top flange formed at an upper edge of said body extending radially inward to support said body on a portion of the container and extending radially outward to form a radially outward extending portion adapted to fit over the key-plate, wherein said radially outward extending portion and said end of said tabs are axially spaced to receive the key-plate therebetween.

14. (Original) The universal adapter clip of Claim 13 further comprising a rim extending downward from said top flange, wherein said rim is adapted to engage a top surface of said key-plate.
